

MERCURY PROTOCOL (ME)

Next Generation Framework for Meme Economics

# PROBLEM STATEMENT

(MEME TOKENS)

1

Fair Launch Price  
Manipulation

5

Investment Failures

4

Loss of Purchase  
Power

3

Surplus Farming

2

Whale Dump & Rug  
Pull

# MERCURY PROTOCOL

An alternative store of value framework that pioneers a revolutionary shift in meme token mechanics by transitioning from a price-based trading strategy to a time-based system and unlocks diverse opportunities in DeFi, fostering intelligent economics that genuinely benefits all investors equally.

SAFE-HAVEN ANTIDUMP  
TIME LOCK FOR LONG  
REGULATED PURCHASE  
POWER

CONTROLLED UNLOCK VIA  
DECENTRALIZED RESERVE  
POOL

BURN VAULT WITH  
MINIMAL PRICE  
GUARANTEE SUPPORT

# MERCURY VS OTHER MEME ECONOMICS

How are we different?

	MERCURY	MEME ECONOMICS
Use-Case Driven	Yes	No
Price Volatility Control	Yes	No
Multi Wallet Loop Lock	Yes	No
Inflation Hedge	Yes	No
Anti Whale Farming	Yes	No
Time Bound Sell Lock	Yes	No
Cash Out Reserve	Yes	No
Automated LP	Yes	No

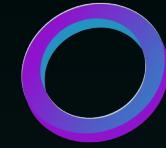

# PROTOCOL BENEFITS

TIME BOUND BUY-SELL RATIO

INFLATION HEDGE

EXPONENTIAL REWARDS

AUTOMATED LP PROTECTION

CAPITAL EFFICIENCY

DEFLATION PROTECTION

# CONTRACT ARCHITECTURE

The protocol is implemented as Smart Contracts ,including an Open Zeppelin layer to assist with corrections as required. At its core, the contract enforces several rules to maintain price balance when a transaction or sale occurs, a below.

**A:** The contract will enforce the following when a user initiates a transaction

- (i) If the transfer amount is 0.75 % of the sender's balance, the address will be locked for 24 hours.
- (ii) If the transfer amount is between 0.5% to 0.75% of the sender's balance, the address will be locked for 12 hours.
- (iii) If the transfer amount is below 0.5 % of the sender's balance, there won't be any lock.
- (iv) **A sender can make only two transactions within 24 hours**

**B:** The contract also enforces the following when a user receives a transaction.

- (i) If a recipient receives above 0.75 % of the wallet balance, the contract will lock the wallet for 24 hours.
- (ii) If a recipient receives between 0.5% to 0.75 % of the wallet balance, the contract will lock the wallet for 12 hours.
- (iii) If a recipient receives less than 0.5% of the wallet balance, there won't be any lock.

# REWARDS ARCHITECTURE

## INFLATION RESISTANT

### POOLS

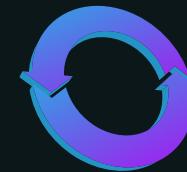

Stablecoin deposit  
APY enhanced by  
\$vME

Farm \$ME  
+ Share of the  
transaction fees

Stake \$ME

Pair \$ME + BNB

\$ME/\$BNB  
POOL

### COMPOUNDING POOLS

# CASH-OUT BURN VAULT

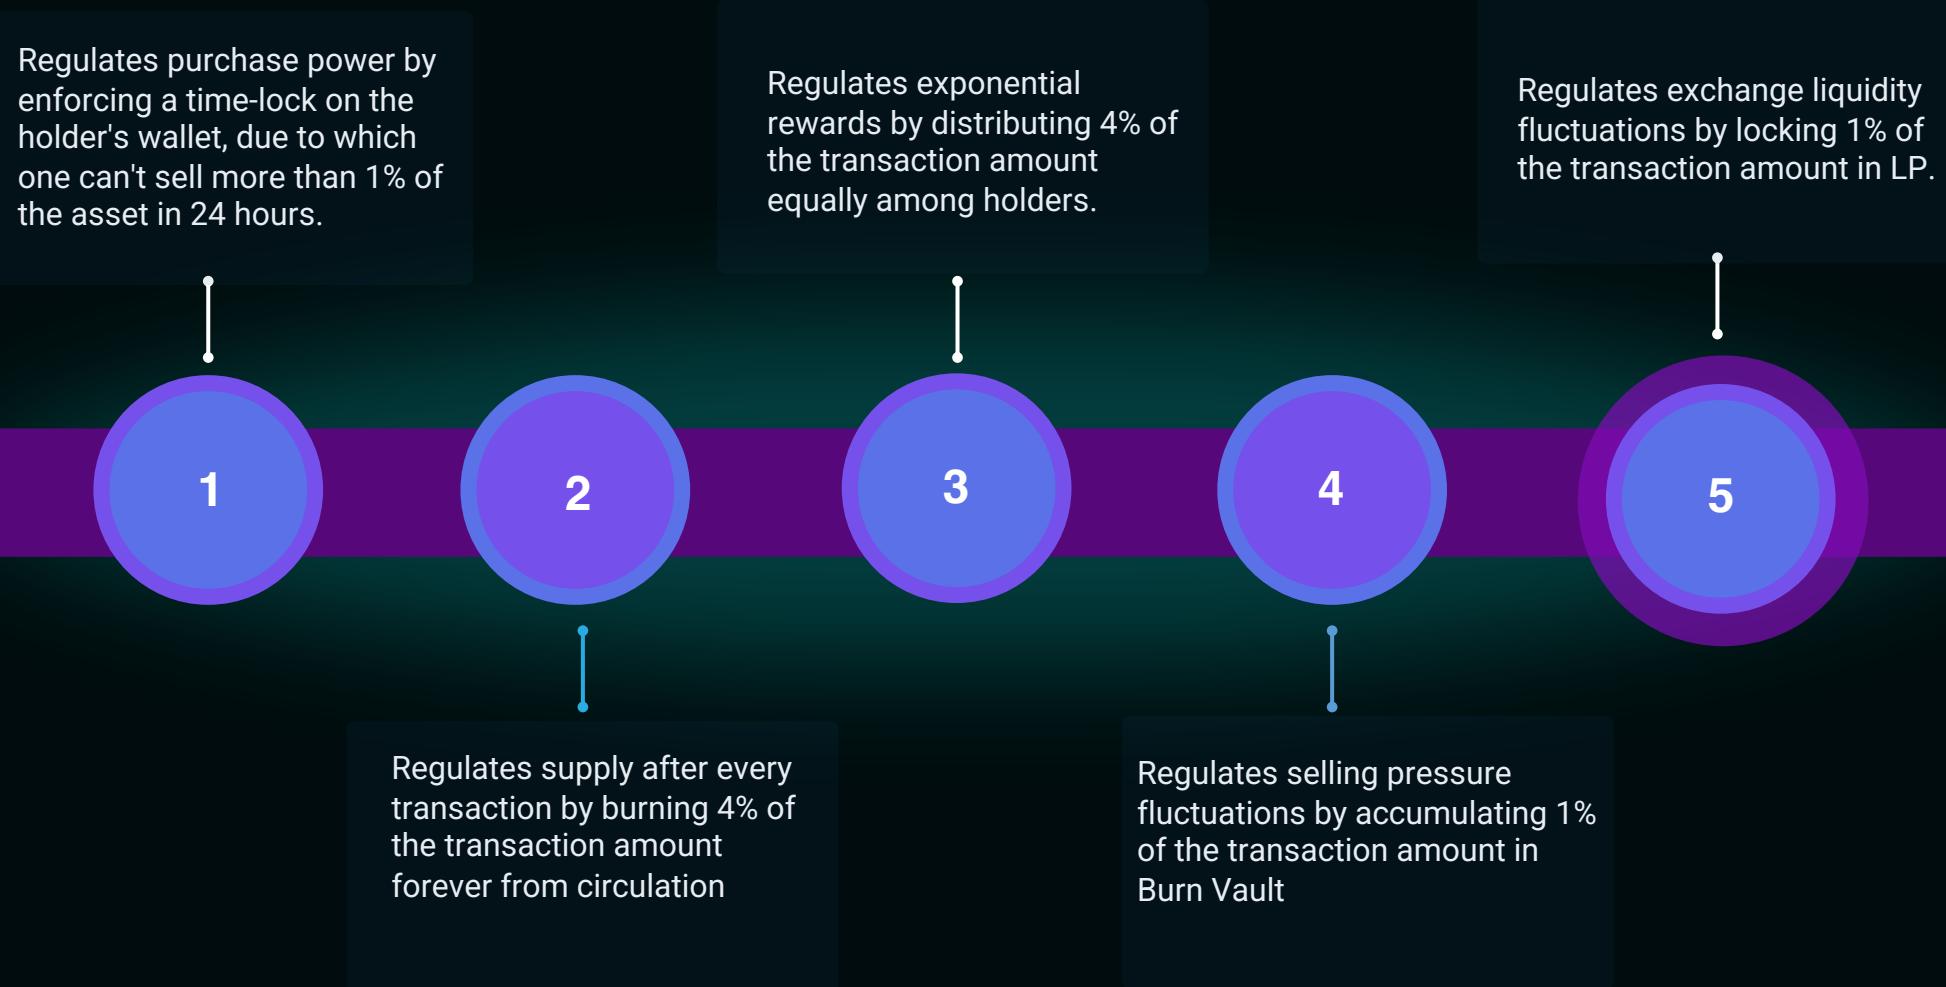

Minimum guarantee price support where the investors can cash out without impacting the market price

# MERCURY PROTOCOL BURN OPERATIONS

MERCURY achieves consistent purchase power increase after every transaction through the following **FIVE** dynamics

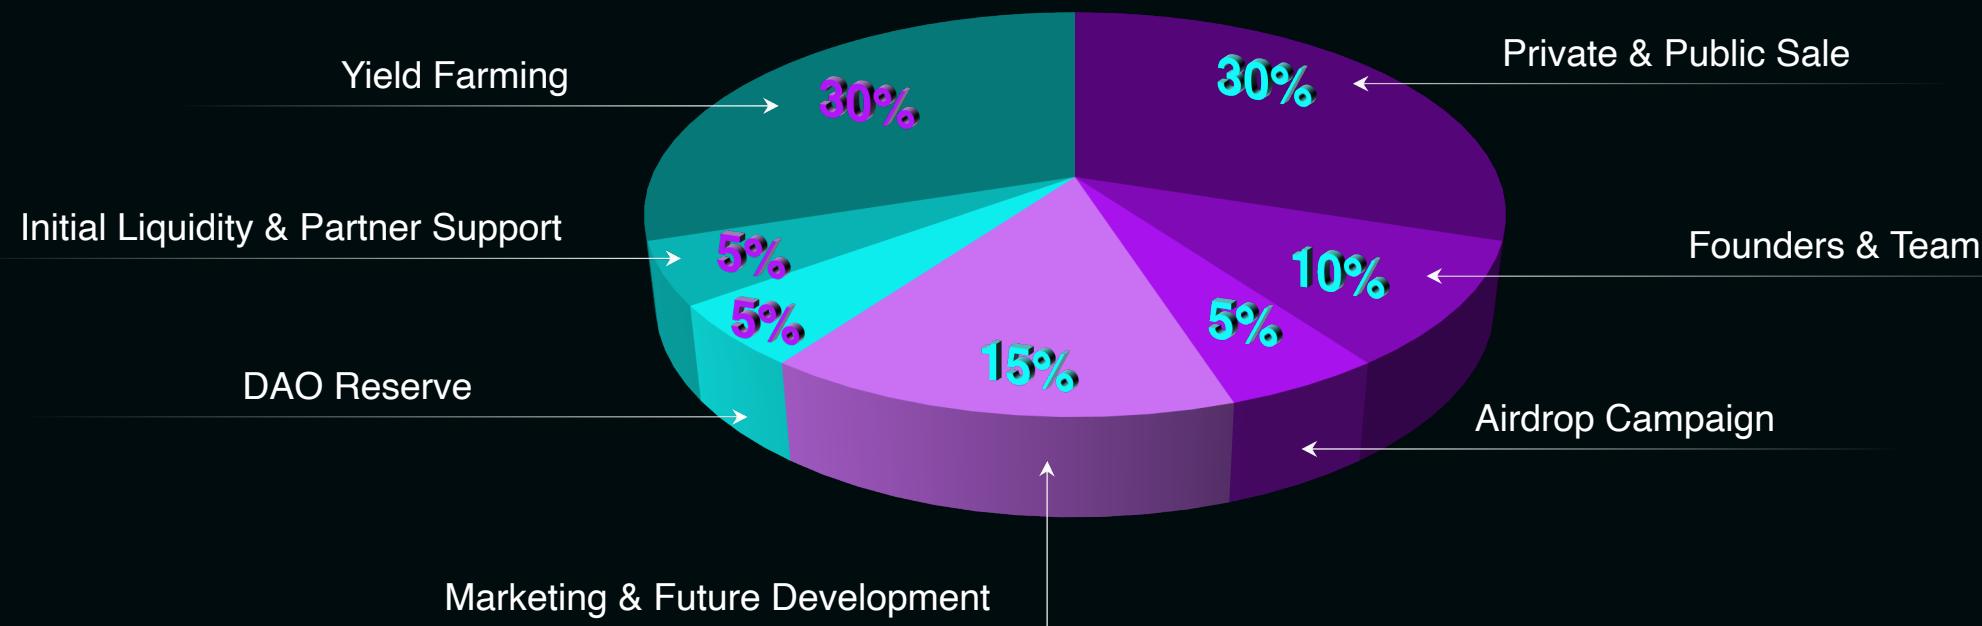

# TOKENOMICS

Token Name : ME

Total Supply = 1,000,000,000,000,000
